

Health Screening

CHARTER MEDICAL

INNOVATIVE HEALTHCARE FOR YOU

Charter Medical Health Screens

Congratulations on taking the first step to maintaining ongoing good health!

At Charter we believe in helping you to maintain a healthy lifestyle by reinforcing health enriching habits and identifying those factors that potentially create future health risks.

Our screening packages are the most comprehensive available. We aim to enable you to guard against the most common causes of future poor health in apparently healthy people. Knowledge and timely information are key in identifying risks which, when averted, greatly increase the likelihood of long term good health.

Our Medical team will guide you through a series of tests and evaluations during your visit to us. These criteria have been developed to highlight the factors that cause medical complications which appear in otherwise healthy people.

Please feel free to ask as many questions as you wish during your visit, as it is important that you understand what needs to be done to promote and maintain a healthy lifestyle.

At the end of your session with us, our Doctor will discuss the findings and, where appropriate, make recommendations to maintain or enhance a healthy lifestyle. If you wish, this information can also be sent to your family doctor, which we strongly recommend.

OTHER SERVICES AT CHARTER MEDICAL

Independent Medical Assessments

Insurance and Pre-employment medicals can also be conducted in Charter's Health & Wellness department. These medicals may be tailored to any company's requirements.

Charter can stock your medial packs onsite in order to facilitate your clients having a walk-in service.

- IMA's are offered Monday to Friday by appointment
- The report will be sent to the underwriter on the same day
- Standard blood results will be sent to the underwriter within two working days

Foot and Ankle

Charter has launched a Foot and Ankle Clinic. Our Health and Wellness department are now offering patients Medical Gait Scans and customized medical orthotics.

This service is suited for patients who have:

- Foot pain constantly or after sports
- Knee and hip pain
- Back pain
- Flat feet

Mole Mapping

- Mole Mapping at Charter Medical involves the examination and individual screening of any suspicious moles or lesions through digital imaging.
- The process of Mole Mapping significantly helps in the diagnosis of melanoma. Images taken are stored and can be used for comparison which helps to identify any changes (including very small ones) in the mole.
- If you have had exposure to the sun or use tanning salons, you should consider a skin health assessment as part of your regular health check.

Our objective at Charter Medical is to ensure that, as a patient, you will receive excellent medical care and attention in a professional and timely manner.
