

CHARTER MEDICAL

INNOVATIVE HEALTHCARE FOR YOU

# Mole Mapping

# 90% of Skin Cancers are Preventable

Charter Medical is Offering You  
€50 OFF Full Body Mole Mapping.

Skin Cancer is the most common cancer in Ireland.

Getting your skin's health assessed should be part  
of your regular health checks.

## **Mole Mapping at Charter**

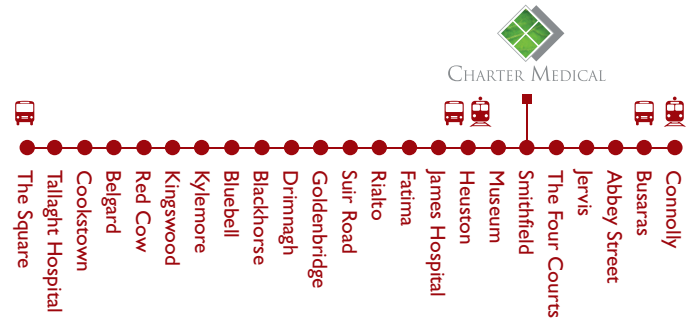

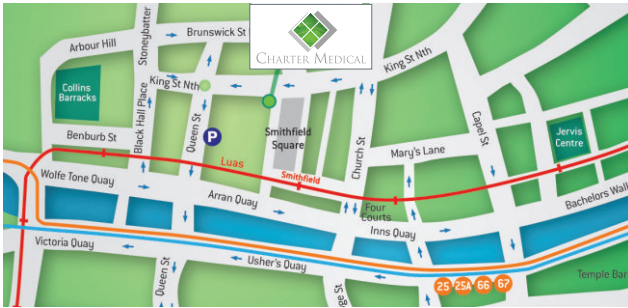

Charter Medical offers full body mole mapping or individual mole screening for any worrying moles or lesions.

Mole Mapping involves the examination and screening of any suspicious moles or lesions through digitally imaging them to access their specific structural features.

The most effective way of combating malignant melanoma is by diagnosing it at an early stage of its development. The key to early detection is to monitor moles for any changes in shape, size or colour; mole mapping provides a baseline reference for tracking moles by documenting the entire surface of a patient's skin photographically.

If you have had exposure to the sun or use tanning salons, you should consider skin health assessments as part of your regular health checks.

Our objective at Charter Medical is to ensure that, as a patient, you will receive excellent medical care and attention in a professional and timely manner.
